Federal Communications Commission  
445 12th Street SW  
Washington, DC 20554

Re: *Wireless E-9-1-1 Location Accuracy Requirements*, PS Docket No. 07-114

Dear Ms. Dortch:

On Tuesday, December 20, 2016, the undersigned and John Snapp of West Safety Services, Inc. (“West Safety”), Fred White of LaaSera Critical Communications Corporation (“LaaSera”), Jamie Barnett of Venable LLP for LaaSera, and Chris Lee, Robert Kubik and John Godfrey of Samsung, met with David Simpson, David Furth, Kenneth Carlberg, David Siehl, Austin Randazzo, Nellie Foosaner and Rasoul Safavian (via phone) of the Public Safety and Homeland Security Bureau (PSHSB) and Henning Schulzrinne of the Office of Strategic Planning & Policy Analysis (OSP).

The purpose of this meeting was to discuss the Commission’s goal of improving location information for 9-1-1 and public safety answering points (PSAPs). Specifically, West Safety, LaaSera and Samsung discussed their ongoing efforts to explore improved location before routing 9-1-1 functionality, as well as hybrid data elements and supplemental location resources that could enhance location information delivered on a 9-1-1 emergency call. Numerous scenarios were discussed utilizing different types of addresses and data points, including dialogue on how this information could be used to assist public safety with emergency response. The parties agreed to update the Commission during the first quarter of 2017 with additional information.

The above participants appreciate the opportunity to meet with the Public Safety and Homeland Security Bureau. Should you have any questions, please do not hesitate to contact me.

Respectfully submitted,

*/s/Mary A. Boyd*
